

CSCI 699 - ProbGen

Probabilistic and Generative Models

Willie Neiswanger

Lecture 9

Course Project – Assignments

The project will be worth a substantial portion of the grade, and consist of four main assignments:

Course Project — Assignments

The project will be worth a substantial portion of the grade, and consist of four main assignments:

- **Project pitch:** Each group will come up with a project idea, make a few slides, and share their idea with the class for feedback (**10 minutes long, on Feb 7 & Feb 14**)

Course Project – Assignments

The project will be worth a substantial portion of the grade, and consist of four main assignments:

- **Project pitch:** Each group will come up with a project idea, make a few slides, and share their idea with the class for feedback (**10 minutes long, on Feb 7 & Feb 14**)
- **Midway report:** Each group will write a short (4 page) midway report for their project, focusing on a literature review, implementation plan, and any initial experiments.
 - Latex template will be provided.

- **Final presentation:** Each group will give a presentation to the class on their final project (**30 minutes long, on Apr 25 & May 2**)
- **Final report:** Each group will submit a final report for their project, describing all details, background, prior work, and results (**8-10 pages long, due May 9**).
 - Latex template will be provided.

Course Project — Midway Report

Due on March 28 (in two weeks!)

Course Project – Midway Report

Due on March 28 (in two weeks!)

- **Literature Review.** Aim to give a full literature review to be used in final report.
- **Implementation Plan.** Goal of outcomes, *i.e.*, what you hope to accomplish in projects. Then the plan for any experiments or implementation.
- **Any initial experiments.** Do you have any initial experiments? (If not, please share any other progress you have made so far.)
